

## NatureMaps 'quick start' guide Information compiled by Dr Mary Retallack, April 2022

**NatureMaps** is an online program that can be used to source information for individual properties located in South Australia. This is a 'quick guide' to help get you started on your property planning project and it provides details of the major pre-European plant communities found in the Coonawarra Wine Region.

Step #	Instruction
Step 1	To get started open the following link <a href="https://data.environment.sa.gov.au/NatureMaps/Pages/default.aspx">https://data.environment.sa.gov.au/NatureMaps/Pages/default.aspx</a>
Step 2	Select the 'start' button START using NatureMaps and wait for the program to load
Step 3	Type your details in the 'find your address or location' bar
Step 4	Select the best fit from the ALVS tab (1) ALVS coonawarra, 5263 and the map will zoom to your address
Step 5	Use the zoom 'in or out' buttons to navigate around the map (toggle out so you can see the region)
Step 6	Select the 'layers' button at the bottom of the screen
Step 7	Select the 'vegetation' layer + 🔻 Vegetation and then select the + button to open the drop down menu.
Step 8	Select 'Pre-European Vegetation' from the drop-down menu
Step 9	Slide the bar to change the transparency of the layer selected Pre European Vegetation
Step 10	Place your cursor over a coloured area on the map to get more information about the selected layer. Then select 'view additional details' in the white summary box to access further details.
Step 11	Once you have identified the name of your local plant community you can search and download a list of plants here <a href="https://www.landscape.sa.gov.au/hf/plants-and-animals/native-plants-animals-and-biodiversity/urban-biodiversity/b4w-native-species">https://www.landscape.sa.gov.au/hf/plants-and-animals/native-plants-animals-and-biodiversity/urban-biodiversity/b4w-native-species</a>

For further info see <a href="https://data.environment.sa.gov.au/NatureMaps/Documents/NatureMaps%20Help%20Guide.pdf">https://data.environment.sa.gov.au/NatureMaps/Documents/NatureMaps%20Help%20Guide.pdf</a>

Please refer to the plant community lists below (which relate the location of the EcoVineyards demonstration sites) or enter your details into NatureMaps and follow the process above to access a plant list for your local area.

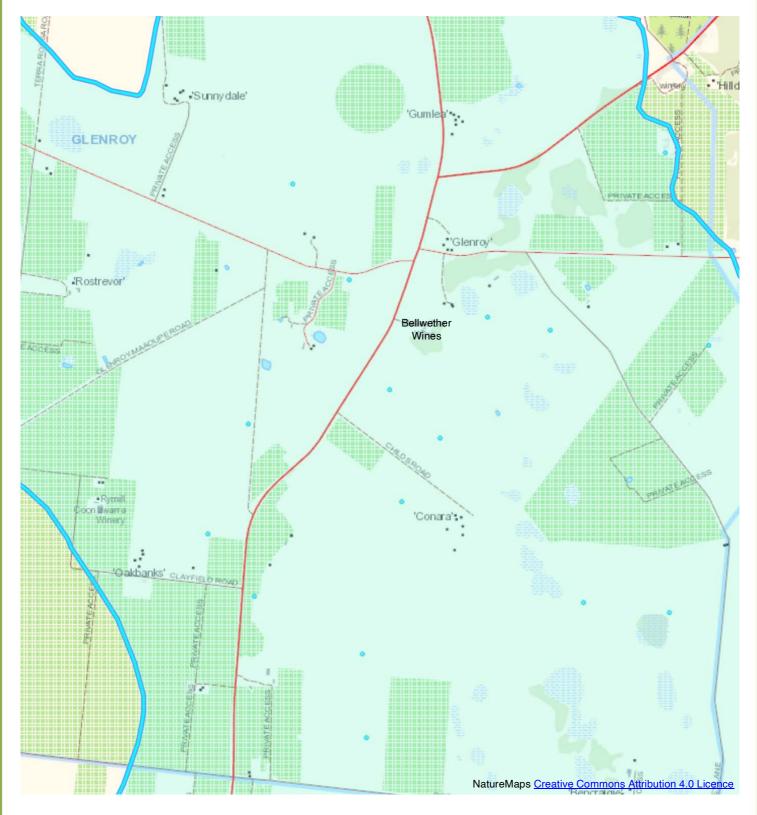

Red gum, *Eucalyptus camaldulensis* var. camaldulensis woodland (H5, H12) (SE0004PE) plant species list

**Description:** Red gum woodland over an open understorey of sedges, rushes, grasses and herbs, and at times sparse low trees such as *Banksia marginata*, *Allocasuarina luehmannii* and shrubs such as *Leptospermum continentale* 

EcoVineyards site: Bellwether Wines

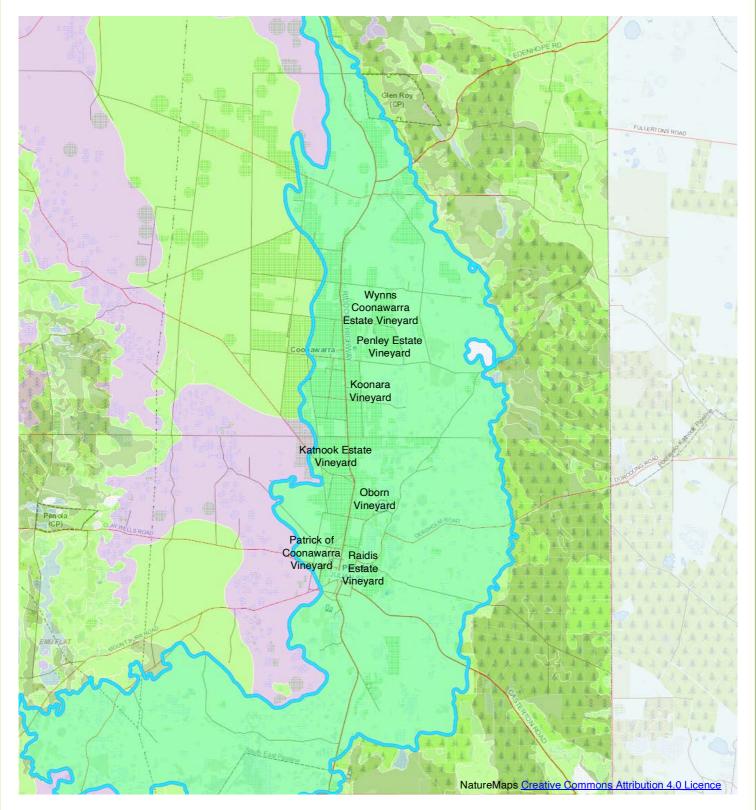

Red gum, *Eucalyptus camaldulensis* var. camaldulensis woodland (H5, H12) (SE0004PE) plant species list

**Description:** Red gum woodland over an open understorey of sedges, rushes, grasses and herbs, and at times sparse low trees such as *Banksia marginata*, *Allocasuarina luehmannii* and shrubs such as *Leptospermum continentale* 

**EcoVineyards sites:** Wynns Coonawarra Estate Vineyard, Penley Estate Vineyard, Koonara Vineyard, Katnook Estate Vineyard, Oborn Vineyard, Patrick of Coonawarra Vineyard, Raidis Estate Vineyard.

### Red gum, Eucalyptus camaldulensis woodland species list

This list may contain historical scientific or common names and includes plant species that grew naturally in this vegetation association that are commercially available. This information has been summarised from <a href="https://www.landscape.sa.gov.au/hf/our-priorities/nature/native-plants-and-animals/native-plants/native-plants/native-plants-pecies-lists/">https://www.landscape.sa.gov.au/hf/our-priorities/nature/native-plants-and-animals/native-plants/ native-plant-species-lists//
<a href="https://www.stateflora.sa.gov.au/">https://www.stateflora.sa.gov.au/</a> and <a href="https://plantselector.botanicgardens.sa.gov.au">https://plantselector.botanicgardens.sa.gov.au</a>. Information is also presented about each plant's potential to provide nectar and/or pollen to nourish predatory arthropods. This information should be used as a guide only.

Habit	Genus	Species	Common name	Floral r	esources Nectar	Height (m)	Width (m)	Tolerance to frost	Flower colour	Flowering time
	Acacia	melanoxylon	blackwood	yes	¹yes	7 to 20	4 to 10	resistant	yellow	winter to spring
	Acacia	pycnantha	golden wattle	yes	¹yes	4 to 6	2 to 6	moderately sensitive	yellow	winter to spring
	Acacia	retinodes var. retinodes	swamp wattle	yes	¹yes	5 to 8	3 to 7	moderately sensitive	yellow	winter to spring
	Allocasuarina	luehmannii	bull oak	yes	no	7 to 8	3 to 4	resistant	insignificant	spring
	Allocasuarina	verticillata	drooping sheoak	yes	no	5 to 8	4 to 6	resistant	red	autumn to winter
	Banksia	marginata	silver banksia	yes	yes	2 to 8	1 to 5	resistant	yellow	spring to autumn
Tree	Eucalyptus	camaldulensis ssp. camaldulensis	river red gum	yes	yes	15 to 20	15 to 20	resistant	white	summer
	Eucalyptus	goniocalyx	long-leafed box	yes	yes	8 to 20	6 to 15	resistant	white	summer
	Eucalyptus	<i>leucoxylon</i> ssp. leucoxylon	SA blue gum	yes	yes	8 to 30	8 to 25	moderately sensitive	cream pink	autumn to winter
	Eucalyptus	obliqua	messmate	yes	yes	15 to 40	12 to 25	moderately sensitive	white	summer
	Eucalyptus	<i>ovata</i> ssp. ovata	swamp gum	yes	yes	6 to 20	5 to 15	resistant	white	autumn to winter
	Acacia	acinacea	gold dust wattle	Yes	¹yes	1 to 2	1 to 2	resistant	yellow	winter to spring
	Acacia	paradoxa	prickly wattle	yes	¹yes	2 to 4	3 to 4	moderately sensitive	yellow	spring
	*Bursaria	<i>spinosa</i> ssp. spinosa	Christmas bush	yes	yes	2 to 4	1 to 3	resistant	white	late spring to late summer
	Callistemon	rugulosus	scarlet bottlebrush	yes	yes	2 to 4	3 to 4	resistant	red	summer
Shrub	Goodenia	amplexans	clasping goodenia	yes	yes	0.5 to 1.2	0.5 to 1	moderately sensitive	yellow	spring to summer
	*Leptospermum	continentale	prickly tea- tree	yes	yes	0.5 to 2	1 to 2	resistant	white	spring to summer
	*Leptospermum	lanigerum	woolly tea- tree	yes	yes	2 to 5	1.5 to 4	resistant	cream	spring to summer
	Myoporum	montanum	water bush	yes	yes	1 to 2	1.5 to 2.5	resistant	white	spring
	Myoporum	viscosum	sticky boobialla	yes	yes	1.5 to 2	1 to 3	moderately sensitive	white	winter to spring
	Pultenaea	largiflorens	twiggy bush-pea	yes	yes	1 to 1.5	0.5 to 1.5	moderately sensitive	yellow orange	winter to spring
Strap leaved	Xanthorrhoea	<i>semiplana</i> ssp. semiplana	grass tree	yes	yes	1 to 3	1 to 2	moderately sensitive	cream	winter to spring

<sup>&</sup>lt;sup>1</sup> Acacia flowers do not produce nectar. However, the leaf and phyllode glands do secrete a nectar or sugary substance which bees, butterflies and other insects have been observed feeding on.

<sup>\*</sup>Growers are encouraged to explore the use of *Bursaria spinosa*, *Leptospermum* ssp. and *Rytidosperma* ssp. as insectary plants in and around their vineyards (Retallack et al., 2019). It is anticipated a broader suite of native insectary plants could extend the richness and abundance of predatory arthropods in vineyards.

### Red gum, Eucalyptus camaldulensis woodland species list - continued

	_		Common	Floral res	ources	Height		Tolerance			Flowering
Habit	Genus	Species	name	Pollen	Nectar	(m)	Width (m)	to frost	Flower	colour	time
	Ajuga	australis	austral bugle	yes		0.3	0.5 to 1	resistant	pink	purple	spring to summer
	Austrostipa	elegantissima	feather spear- grass	yes	no	1	1	resistant	green	brown	winter to spring
	Chloris	truncata	windmill grass	yes	no	0.3 to 0.5	0.2 to 0.5	resistant	cre	am	spring to summer
	Kennedia	prostrata	scarlet runner or running postman	yes	yes	0.1	1.5 to 4	moderately sensitive	re	ed	winter to spring
	Microlaena	<i>stipoides</i> var. stipoides	weeping rice- grass	yes	no	0.1 to 0.7	0.2 to 1	moderately sensitive	cre	am	spring to summer
Ground cover	*Rytidosperma	caespitosum	common wallaby grass	yes	no	0.2 to 0.8	0.1 to 0.3	resistant	cre	am	spring

	*Rytidosperma	fulvum	wallaby grass	yes	no	0.4 to 0.7	0.5	resistant	cre	am	spring to summer
	*Rytidosperma	geniculatum	kneed wallaby grass	yes	no	0.1 to 0.5	0.1 to 0.3	resistant	cre	am	spring to autumn
	*Rytidosperma	setaceum	small-flowered wallaby grass	yes	no	0.2 to 0.6	0.1 to 0.3	resistant	cre	am	spring to summer
	Themeda	triandra	kangaroo grass	yes	no	0.4 to 1	0.5 to 1	resistant	bro	wn	frequent
	Wahlenbergia	<i>stricta</i> ssp. stricta	tall bluebell	yes	yes	0.3 to 0.6	0.5 to 1	moderately sensitive	bl	ue	frequent
	Carex	tereticaulis	rush sedge	yes	yes	0.6 to 1.2	0.6 to 1	resistant	bro	wn	spring to summer
Sedges	Cyperus	gymnocaulos	spiny flat- sedge	yes		0.2 to 0.7	0.5 to 1	resistant	bro	wn	winter to summer
and	Juncus	kraussii	sea rush	yes		0.5 to 1	0.5 to 1	resistant	bro	wn	frequent
rushes	Juncus	pallidus	pale rush	yes		0.5 to 2	0.5 to 2	resistant	bro	own	spring to summer
	Juncus	pauciflorus	loose-flower rush	yes		0.5 to 1	0.5 to 1	resistant	bro	own	summer
Bulbs and lilies	Dianella	<i>revoluta</i> var. revoluta	black-anther flax-lily	<sup>2</sup> buzz pollinated (pollen only accessible to native bees)	no	0.3 to 1	0.5 to 2	resistant	bl	ue	spring to summer

<sup>&</sup>lt;sup>2</sup> **Buzz pollination:** Some native bees use a special pollination technique called 'buzz pollination' (sonication) i.e. the bluebanded bee, bangs its head on the flower's anthers 350 times a second to release the pollen. Plants from the Solanaceae (nightshade) family (tomatoes, capsicums and eggplants) and many Australian native plants including *Hibbertia* ssp. and *Dianella* ssp. are buzz pollinated. These plants have the capacity to boost biodiversity and support populations of native bees but their pollen resources may not be readily available to predatory arthropods.

### Native insectary plants (general)

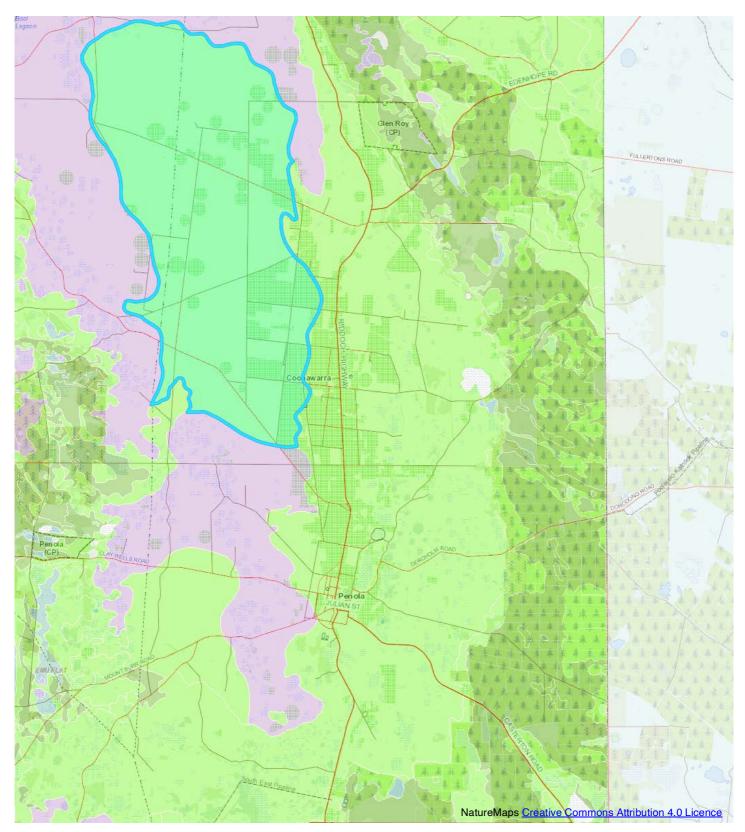

It is reported that the longevity of parasitoid wasps which predominantly feed on nectar are significantly enhanced by Australian native plants including Christmas bush, *Bursaria spinosa*, crimson bottlebrush, *Callistemon* sp., Hakea, *Hakea* sp., prickly tea-tree, *Leptospermum continentale*, woolly tea-tree, *Leptospermum lanigerum*, austral trefoil, *Lotus australis*, creeping mint, *Mentha satureioides*, dryland tea tree, *Melaleuca lanceolata*, creeping boobialla, *Myoporum parvifolium*, sticky boobialla, *Myoporum petiolatum*, and wallaby grasses, *Rytidosperma* ssp. In addition, a recent desktop review of plants native to South Australia identified a broader suite of locally-adapted native plants which are regarded as having the capacity to provide insectary benefits and may hold widespread appeal. They include wild rosemary, *Dampiera rosmarinifolia*, clasping goodenia, *Goodenia amplexans*, hop goodenia, *Goodenia ovata*, cut-leaf goodenia, *Goodenia pinnatifida*, boobialla, *Myoporum insulare*, long-leaved bush-pea, *Pultenaea daphnoides*, twiggy bush-pea, *Pultenaea largiflorens*, blue-rod, *Stemodia florulenta*, fairy fan-flower, *Scaevola aemula*, as well as species of *Acacia* ssp., *Eucalyptus* ssp., and *Lomandra* ssp. that may be suited to a particular site. Other plants previously identified for their insectary benefits in vineyards include straw wallaby grass, *Rytidosperma richardsonii*, windmill grass, *Chloris truncata*, and creeping saltbush, *Atriplex semibaccata*.

# Silver banksia, *Banksia marginata* woodland (H67) (SE0018PE) plant species list

Description: Silver banksia low woodland over a grassy and herbaceous understorey

### Silver banksia, Banksia marginata woodland species list

This list may contain historical scientific or common names and includes plant species that grew naturally in this vegetation association that are commercially available. This information has been summarised from <a href="https://www.landscape.sa.gov.au/hf/our-priorities/nature/native-plants-and-animals/native-plants/native-plants-pecies-lists/">https://www.landscape.sa.gov.au/hf/our-priorities/nature/native-plants-and-animals/native-plants/ native-plant-species-lists//

### Native insectary plants (general)

It is reported that the longevity of parasitoid wasps which predominantly feed on nectar are significantly enhanced by Australian native plants including Christmas bush, *Bursaria spinosa*, crimson bottlebrush, *Callistemon* sp., Hakea, *Hakea* sp., prickly tea-tree, *Leptospermum continentale*, woolly tea-tree, *Leptospermum lanigerum*, austral trefoil, *Lotus australis*, creeping mint, *Mentha satureioides*, dryland tea tree, *Melaleuca lanceolata*, creeping boobialla, *Myoporum parvifolium*, sticky boobialla, *Myoporum petiolatum*, and wallaby grasses, *Rytidosperma* ssp.

In addition, a recent desktop review of plants native to South Australia identified a broader suite of locally-adapted native plants which are regarded as having the capacity to provide insectary benefits and may hold widespread appeal. They include wild rosemary, *Dampiera rosmarinifolia*, clasping goodenia, *Goodenia amplexans*, hop goodenia, *Goodenia ovata*, cut-leaf goodenia, *Goodenia pinnatifida*, boobialla, *Myoporum insulare*, long-leaved bush-pea, *Pultenaea daphnoides*, twiggy bush-pea, *Pultenaea largiflorens*, blue-rod, *Stemodia florulenta*, fairy fan-flower, *Scaevola aemula*, as well as species of *Acacia* ssp., *Eucalyptus* ssp., and *Lomandra* ssp. that may be suited to a particular site. Other plants previously identified for their insectary benefits in vineyards include straw wallaby grass, *Rytidosperma richardsonii*, windmill grass, *Chloris truncata*, and creeping saltbush, *Atriplex semibaccata*.

#### More information?

If you would like to find out more information about individual plants. Visit the Botanic Gardens of SA 'Plant Selector' <a href="http://plantselector.botanicgardens.sa.gov.au">http://plantselector.botanicgardens.sa.gov.au</a>. Enter your postcode and press search. View the results and export data to retain a copy. The Excel spreadsheet contains detailed notes about each plant and its suggested uses.

### Thank you to our project partners!

### **Acknowledgement of country**

The EcoVineyards project acknowledges Aboriginal people as the First Peoples and Nations of the lands and waters we live and work upon and we pay our respects to their Elders past, present and emerging. We acknowledge and respect the deep spiritual connection and the relationship that Aboriginal and Torres Strait Islander people have to Country.

The Bungandidj people are the traditional custodians of the Limestone Coast region and have an ongoing connection to the land.
