

# Wrattonbully Wine Region

## NatureMaps 'quick start' guide

# Information compiled by Dr Mary Retallack, May 2021

**NatureMaps** is an online program that can be used to source information for individual properties located in South Australia. This is a 'quick guide' to help get you started on your property planning project and it provides details of the major pre-European plant communities found in the Wrattonbully Wine Region.

Step #	Instruction
Step 1	To get started open the following link https://data.environment.sa.gov.au/NatureMaps/Pages/default.aspx
Step 2	Select the 'start' button START using on and wait for the program to load
Step 3	Type your details in the 'find your address or location' bar
Step 4	Select the best fit from the ALVS tab (70) ALVS WRATTONBULLY, 5271 and the map will zoom to your address
Step 5	Use the zoom 'in or out' buttons to navigate around the map (toggle out so you can see the region) $\frac{+}{-}$
Step 6	Select the 'layers' button at the bottom of the screen
Step 7	Select the 'vegetation' layer + 🖉 Vegetation and then select the + button to open the drop down menu.
Step 8	Select 'Pre-European Vegetation' from the drop-down menu
Step 9	Slide the bar to change the transparency of the layer selected <i>Pre European Vegetation</i>
Step 10	Place your cursor over a coloured area on the map to get more information about the selected layer. Then select 'view additional details' in the white summary box to access further details.
Step 11	Once you have identified the name of your local plant community you can search and download a list of plants here <a href="https://www.landscape.sa.gov.au/hf/plants-and-animals/native-plants-animals-and-biodiversity/urban-biodiversity/b4w-native-species">https://www.landscape.sa.gov.au/hf/plants-and-animals/native-plants-animals-and-biodiversity/urban-biodiversity/b4w-native-species</a>

For further info see https://data.environment.sa.gov.au/NatureMaps/Documents/NatureMaps%20Help%20Guide.pdf

Please refer to the plant community lists below (which relate the location of the EcoVineyards demonstration sites) or enter your details into NatureMaps and follow the process above to access a plant list for your local area.

You may also be interested in using **nrmFarm**, a web based farm management tool which allows you to create and save a map of your farm including property boundaries, paddocks and infrastructure via secure login. It also allows you to record information like chemical applications, sowing dates, yield data, livestock movements, soil test results, and weed sightings. The nrmFarm is available for the following regions. The nrmFarm program can be accessed here https://www.naturalresources.sa.gov.au/samurraydarlingbasin/land-and-farming/tools-for-land-managers/nrm-farm

This project is supported by the Department of Agriculture, Water and the Environment through funding from Australian Government's National Landcare Program

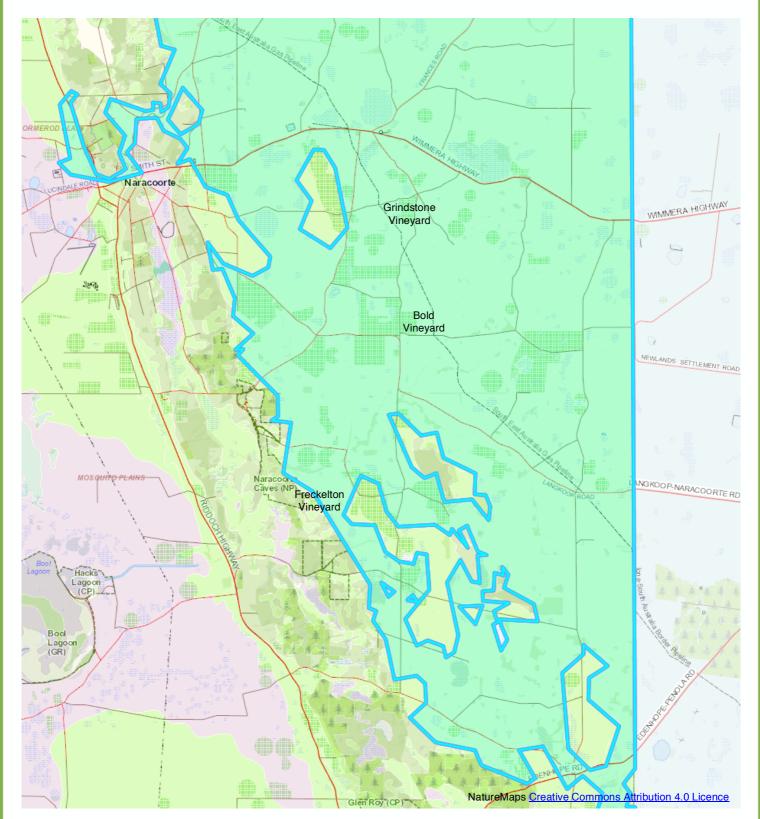

## Wrattonbully Wine Region

## Red gum, *Eucalyptus camaldulensis* var. camaldulensis woodland (H5, H12) (SE0004PE) plant species list

**Description:** Red gum woodland over an open understorey of sedges, rushes, grasses and herbs, and at times sparse low trees such as *Banksia marginata*, *Allocasuarina luehmannii* and shrubs such as *Leptospermum continentale* 

This project is supported by the Department of Agriculture, Water and the Environment through funding from Australian Government's National Landcare Program

### Red gum, Eucalyptus camaldulensis woodland species list

This list may contain historical scientific or common names and includes plant species that grew naturally in this vegetation association that are commercially available. This information has been summarised from <a href="https://www.landscape.sa.gov.au/hf/plants-and-animals/native-plants-animals-and-biodiversity/urban-biodiversity/b4w-native-species">https://www.landscape.sa.gov.au/hf/plants-and-animals/native-plants-animals-and-biodiversity/urban-biodiversity/b4w-native-species</a> <a href="https://www.stateflora.sa.gov.au/">https://www.landscape.sa.gov.au/hf/plants-and-animals/native-plants-animals-and-biodiversity/urban-biodiversity/b4w-native-species</a> <a href="https://www.stateflora.sa.gov.au/">https://www.stateflora.sa.gov.au/</a> and <a href="https://plantselector.botanicgardens.sa.gov.au">https://plantselector.botanicgardens.sa.gov.au</a>. This information should be used as a guide only.

Habit	Genus	Species	Common name		esources	Height	Width (m)	Tolerance to frost	Flower colour		Flowering time
			nunic	Pollen	Nectar	(m)	()				winter to

	Acacia	pycnantha	golden wattle	yes	<sup>1</sup> yes	4 to 6	2 to 6	moderately sensitive	yellow		winter to spring
	Acacia	retinodes <i>var.</i> <i>retinodes</i>	swamp wattle	yes	<sup>1</sup> yes	5 to 8	3 to 7	moderately sensitive	yellow		winter to spring
	Allocasuarina	luehmannii	bull oak	yes	no	7 to 8	3 to 4	resistant	insigr	iificant	spring
	Allocasuarina	verticillata	drooping sheoak	yes	no	5 to 8	4 to 6	resistant	red		autumn to winter
	Banksia	marginata	silver banksia	yes	yes	2 to 8	1 to 5	resistant	yel	yellow	
Tree	Eucalyptus	<i>camaldulensis</i> ssp. camaldulensis	river red gum	yes	yes	15 to 20	15 to 20	resistant	white		summer
	Eucalyptus	goniocalyx	long-leafed box	yes	yes	8 to 20	6 to 15	resistant	wł	nite	summer
	Eucalyptus	<i>leucoxylon</i> ssp. leucoxylon	SA blue gum	yes	yes	8 to 30	8 to 25	moderately sensitive	cream	pink	autumn to winter
	Eucalyptus	obliqua	messmate	yes	yes	15 to 40	12 to 25	moderately sensitive	y white		summer
	Eucalyptus	<i>ovata</i> ssp. ovata	swamp gum	yes	yes	6 to 20	5 to 15	resistant	wł	nite	autumn to winter
	Acacia	acinacea	gold dust wattle	yes	<sup>1</sup> yes	1 to 2	1 to 2	resistant	yel	low	winter to spring
	Acacia	paradoxa	prickly wattle	yes	<sup>1</sup> yes	2 to 4	3 to 4	moderately sensitive	yel	low	spring
	*Bursaria	<i>spinosa</i> ssp. spinosa	Christmas bush	yes	yes	2 to 4	1 to 3	resistant	white		late spring to late summer
	Callistemon	rugulosus	scarlet bottlebrush	yes	yes	2 to 4	3 to 4	resistant	re	ed	summer
Shrub	Goodenia	amplexans	clasping goodenia	yes	yes	0.5 to 1.2	0.5 to 1	moderately sensitive	yellow		spring to summer
	*Leptospermum	continentale	prickly tea- tree	yes	yes	0.5 to 2	1 to 2	resistant	white		spring to summer
	*Leptospermum	lanigerum	woolly tea- tree	yes	yes	2 to 5	1.5 to 4	resistant	cream		spring to summer
	Myoporum	montanum	water bush	yes	yes	1 to 2	1.5 to 2.5	resistant	white		spring
	Myoporum	viscosum	sticky boobialla	yes	yes	1.5 to 2	1 to 3	moderately sensitive	white		winter to spring
	Pultenaea	largiflorens	twiggy bush-pea	yes	yes	1 to 1.5	0.5 to 1.5	moderately sensitive	yellow	orange	winter to spring
Strap leaved	Xanthorrhoea	<i>semiplana</i> ssp. semiplana	grass tree	yes	yes	1 to 3	1 to 2	moderately sensitive	cream		winter to spring

<sup>1</sup>*Acacia* flowers do not produce nectar. However, the leaf and phyllode glands do secrete a nectar or sugary substance which bees, butterflies and other insects have been observed feeding on.

\*Growers are encouraged to explore the use of *Bursaria spinosa*, *Leptospermum* ssp. and *Rytidosperma* ssp. as insectary plants in and around their vineyards (Retallack et al., 2019). It is anticipated a broader suite of native insectary plants could extend the richness and abundance of predatory arthropods in vineyards.

<sup>2</sup> **Buzz pollination:** Some native bees use a special pollination technique called 'buzz pollination' (sonication) i.e. the bluebanded bee, bangs its head on the flower's anthers 350 times a second to release the pollen. Plants from the Solanaceae (nightshade) family (tomatoes, capsicums and eggplants) and many Australian native plants including *Hibbertia* ssp. and *Dianella* ssp. are buzz pollinated. These plants have the capacity to boost biodiversity and support populations of native bees but their pollen resources may not be readily available to predatory arthropods.

### Red gum, Eucalyptus camaldulensis woodland species list - continued

### Native insectary plants (general)

It is reported that the longevity of parasitoid wasps which predominantly feed on nectar are significantly enhanced by Australian native plants including Christmas bush, *Bursaria spinosa*, crimson bottlebrush, *Callistemon* sp., Hakea, *Hakea* sp., prickly tea-tree, *Leptospermum continentale*, woolly tea-tree, *Leptospermum lanigerum*, austral trefoil, *Lotus australis*, creeping mint, *Mentha satureioides*, dryland tea tree, *Melaleuca lanceolata*, creeping boobialla, *Myoporum parvifolium*, sticky boobialla, *Myoporum petiolatum*, and wallaby grasses, *Rytidosperma* ssp.

In addition, a recent desktop review of plants native to South Australia identified a broader suite of locally-adapted native plants which are regarded as having the capacity to provide insectary benefits and may hold widespread appeal. They include wild rosemary, *Dampiera rosmarinifolia*, clasping goodenia, *Goodenia amplexans*, hop goodenia, *Goodenia ovata*, cut-leaf goodenia, *Goodenia pinnatifida*, boobialla, *Myoporum insulare*, long-leaved bush-pea, *Pultenaea daphnoides*, twiggy bush-pea, *Pultenaea largiflorens*, blue-rod, *Stemodia florulenta*, fairy fan-flower, *Scaevola aemula*, as well as species of *Acacia* ssp., *Eucalyptus* ssp., and *Lomandra* ssp. that may be suited to a particular site. Other plants previously identified for their insectary benefits in vineyards include straw wallaby grass, *Rytidosperma richardsonii*, windmill grass, *Chloris truncata*, and creeping saltbush, *Atriplex semibaccata*.

### More information?

If you would like to find out more information about individual plants. Visit the Botanic Gardens of SA 'Plant Selector' <u>http://plantselector.botanicgardens.sa.gov.au</u>. Enter your postcode and press search. View the results and export data to retain a copy. The Excel spreadsheet contains detailed notes about each plant and its suggested uses.

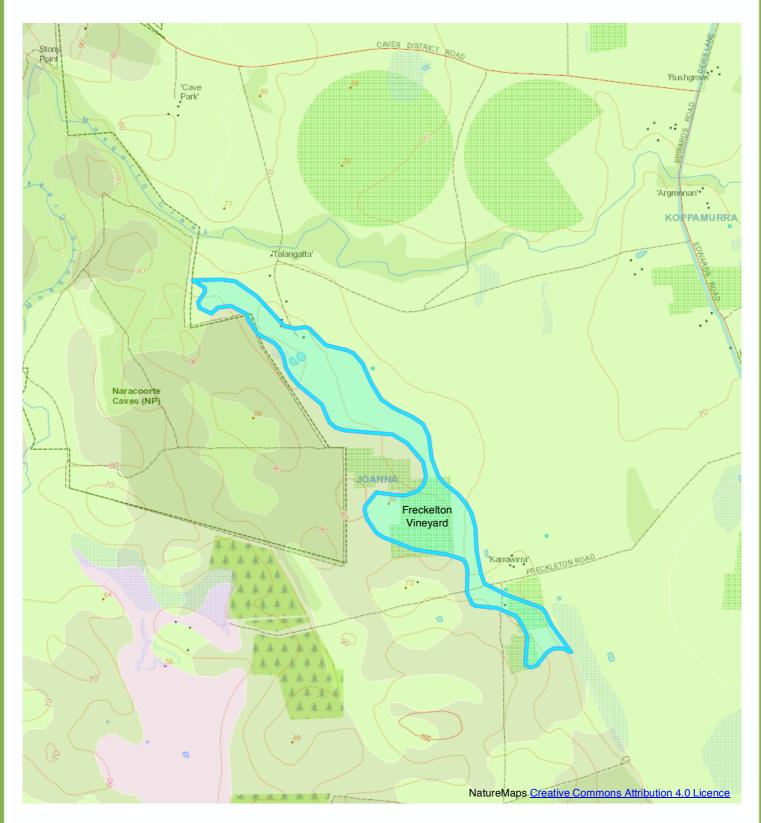

# Wrattonbully Wine Region

*Eucalyptus leucoxylon* ssp. leucoxylon woodland (H10) (AP0003PE) (SE0008PE) plant species list

**Description:** Eucalyptus *leucoxylon* ssp. leucoxylon woodland over a grassy and herbaceous understorey and sparse cover of shrubs (eg. *Cheilanthes austrotenuifolia*, *Themeda triandra*, *Lomandra multiflora* ssp dura, *Dodonaea viscosa* ssp. spathulata, *Acacia paradoxa*, and *Gonocarpus elatus*)

This project is supported by the Department of Agriculture, Water and the Environment through funding from Australian Government's National Landcare Program
